COVER LETTER

Dear Company Hiring Team,

I am writing to express my interest in the Position Title position at Company. I am a full-stack software engineer with experience across the entire stack, from React/TypeScript front ends and Node.js/Python backends to the DevOps and infrastructure that ships and runs them, and I believe I would be a strong addition to your team.

In my current role as a Senior Software Engineer at Raise Robotics, I have built and maintained a cross-platform Electron/React/TypeScript desktop application end-to-end, written backend services in Python and C++, and established CI/CD and containerization practices (Docker, GitHub Actions, AWS) that significantly improved our team's development velocity. These experiences have given me a broad, full-stack skill set spanning user-facing software, backend systems, and infrastructure – one that I am eager to bring to Company.

Thank you for your time and consideration. I look forward to the possibility of speaking with you further.

Sincerely,
Sam Cribbs
